INDEX.

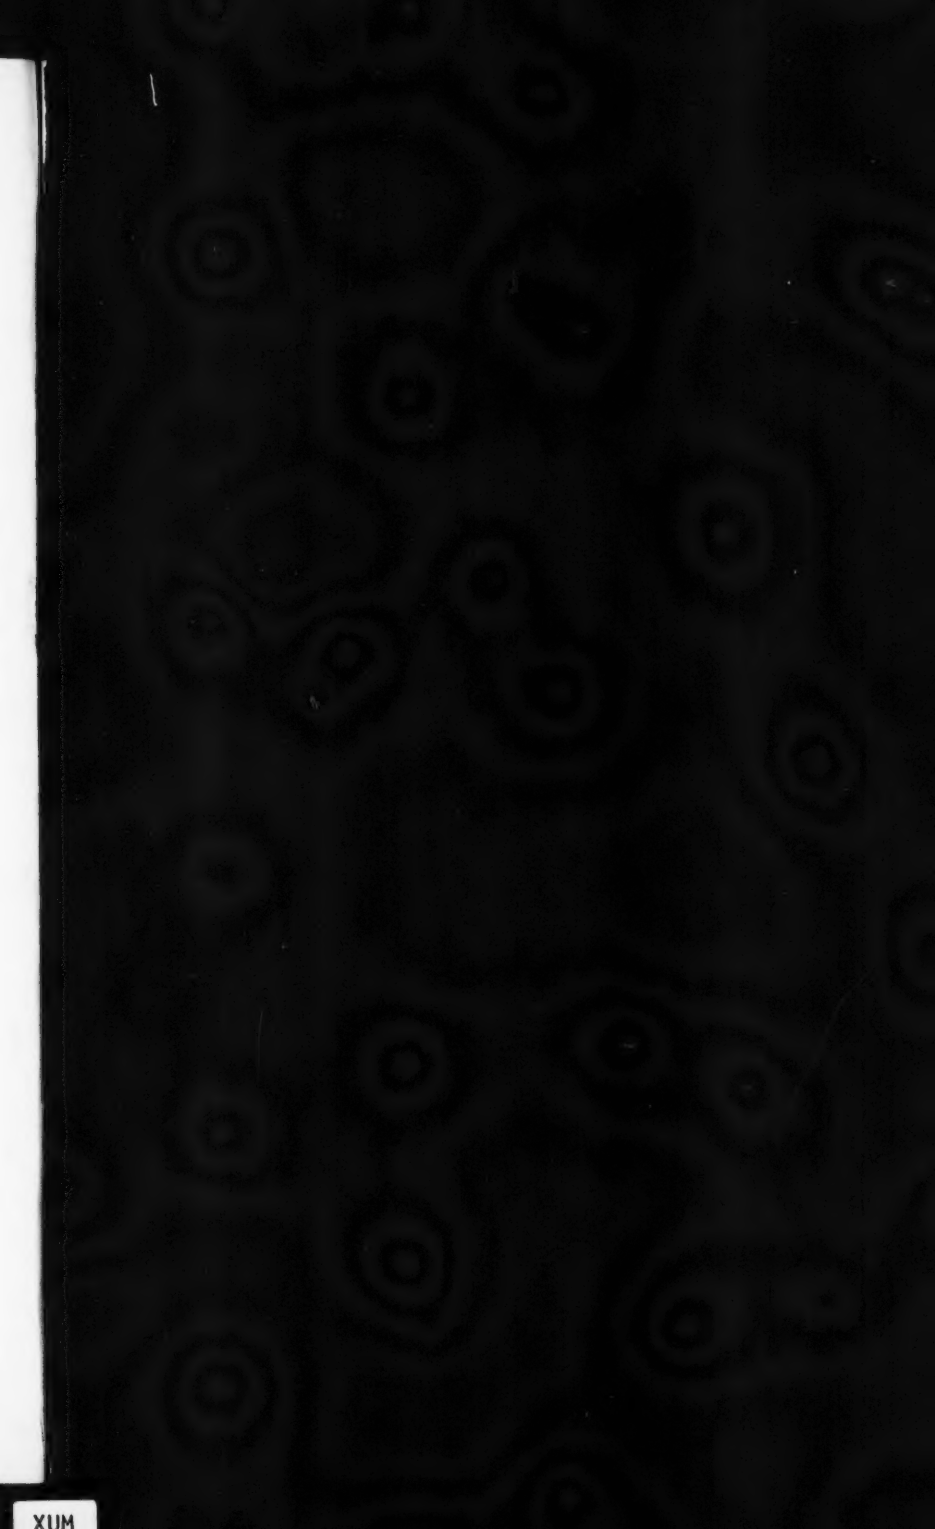
Abies excelsa, Bisexual Cones of, 228
Agassiz on the Museum at Cambridge, North America, 284
American Association, Proceedings of, 281
Anæsthetic Agents, their Effects on Sensitive Plants, 87
Aniline present in certain Fungi, 305
Ascidiæ, Branchial Sac of, 109
Aurora of August and September 1859, 281
Barometers, Improvement in, 284
Baxter, H. F., on Nerve-Force, 22
Beale, Lionel S., on the Permanence of Species, 233
Beaver, Female, Dissection of, 14
Bell, Rev. Thomas B., on the Red-legged Crow and on the Swift, 151
Binocular Vision, 285
Blind, Vital Statistics of, 290
Botanical Society of Edinburgh, Proceedings of, 158, 296
Botrydium granulatum, Development of, 206
Brewster, Sir David, on the Action of Uncrystallised Films upon Common and Polarised Light, 109
——— on Microscopic Vision, 267
Brisbane, Sir Thomas Makdougall, Death of, 108
British Association, Proceedings of, 265
Brown, Rev. Thomas, on the Mountain Limestone and Lower Carboniferous Rocks of the Fifeshire Coast, 115
Bryson, Alex., on the Boring of the Pholadidæ, 124
——— on the Structure of Pearl, 149
Canada, Climate of, on the Pleistocene Period, 309
Christison, Professor, on the Capture of Whales by Means of Poison, 72
Claperede, Professor Edward, on the Reproduction of a Medusa, 147
Cleland, Dr John, on the Dissection of a Female Beaver, 14
——— on the Vomer in Man and Mammalia, 242
Coffer-Dam, New Portable, 287
Coldstream, William, on the Effects of Anæsthetic Agents on Sensitive Plants, 87
Collingwood, Dr, on Recurrent Animal Form, 278
Colouring Matters of Plants, 52
Darwin's Theory of the Origin of Species discussed, 272
Daubeny, Dr, on the Elevation Theory of Volcanoes, 173
Davy, Dr John, on an Unusual Drought in the Lake District of Cumberland, 127
——— on the Colour of the Rhone, 213

Dawson, Principal, on the Climate of Canada in the Pleistocene Period, 309
Dickson, Dr Alexander, on Bisexual Cones in the Spruce Fir, 228
Draper, Professor, on the Intellectual Development of Europe, 273
Dresser, Dr, on the Stem in Axis as the Fundamental Organ in Vegetable Structure, 300
Dufour on Fluorescent Solution from the Manna Ash, 308
Duns, Rev. John, on the Birds of Linlithgowshire, 124
Earthquakes in Cornwall, 1
Earthquake Shocks in Cornwall, 203
Eclipse, Solar, of 1860, 287
——— of the Sun, as observed at Labrador in 1860, 295
Edinburgh, Climate of, 111
Edmonds, Richard, on Agitations of the Sea in the West of England, and on Earthquakes in Cornwall, 1
——— on recent Earthquake Shocks in Cornwall, 203
Everest, Colonel, on a Longitude Method for Travellers, 20
Everett, Professor, on the Reduction of Underground Temperature, 137
Fire-Damp, Explosions of, in Collieries, 294
Flint Implement near Amiens, 311
Flint Implements, associated with Extinct Mammalia, 314
Flower, J. D., on a Flint Implement discovered near Amiens, 311
Fluorescent Solution from *Fraxinus Ornus*, 308
Forbes, Professor J. D., on the Climate of Edinburgh for Fifty-six years, 111
Galletly John, on the Action of Chlorine on Citric Acid, 128
Gases, Narcotic and Irritant, their Effect on Plants, 65
Geikie, Archibald, on the Chronology of the Trap Rocks of Scotland, 117
Gold, Distribution of, in Veins, 288
Harrison, B. F., on the Solution of Ice in Inland Waters, 283
Hector, Dr, on the Geology of Captain Palliser's Expedition in British North America, 225
Hogg, John, on the Distinction of a Plant and an Animal, 216
How, Professor Henry, on an Oil-Coal near Pictou, Nova Scotia, 80
Hydraulic Cement, 293
Hunter, Dr Alexander, on Indian Woods as used for Engraving, 163.
Irving, Dr James, on the effects of *Lathyrus sativus* in causing Paralysis, 302
Jaffrey, A. T., on Disease of Nutmeg-trees, 165
Jeffreys on British Teredines, 278
Kingdoms of Nature Divided, 216
Kola-Nut, 297
Lathyrus sativus, its effects in causing Palsy in India, 304
Lawson, Professor George, on the Structure and Development of *Botrydium granulatum*, 206
——— on *Celastrus scandens*, and on Colouring Matters of Plants, 52
Laycock, Professor, on Mind and Brain, reviewed, 102
Lead-bearing Regions of North America, 284
Livingston, John S., on the Effects of Narcotic and Irritant Gasses on Plants, 65
——— Rev. Dr., Letter from, 118
Longitude, Method for Travellers, 20
Loomis, Elias, on Natural Ice-houses, or Frozen Wells, 283
Lowe, John, Remarks on *Sarcina ventriculi*, 58
Macvicar, Dr, on Vegetable Morphology, 185

M'Bain, Dr James, on Osteological Remains in Harris, 149
——— on Ornithic Fossil Bones from New Zealand, 155
M'Nab, Dr Gilbert, Biography of, 158
——— James, on Vegetation in Edinburgh Botanic Garden, 169
Microscopic Vision, 267
Microscopical Analysis of *Celastrus scandens*, 52
Mitchell, Dr Arthur, on Ozone, 39
——— William, on Trichotomous Arrangement of Plants, 162
Murray, Andrew, Address to the Royal Physical Society, 137.
——— on Branchial Sac of Simple Ascidiæ, 109
——— on Californian Trees, 166
——— on a New Leaf Insect, 152
Movements in Cells of Plants, 298
Museum of Comparative Zoology at Cambridge, North America, 284
Nerve-Force, Remarks on, 22
Newberry, Dr, on the Ancient Vegetation of North America, 305
Nitrogen, Assimilation of, by Plants, 292
——— in Soil at Various Depths, 307
Nivens, Dr J. Birkbeck, on the Archetype of Flowering Plants, 159
Nomenclature, Botanical and Zoological, 321
North America, British, Geology of, 225
Ogilvie, Dr George, on some Peculiarities in the Stem of the Ivy, 168
Oil-Coal near Pictou, Nova Scotia, 80
Ozone, Remarks on, 39
Papyrine, 324
Peach, Charles W., on the Chalk-flints of Caithness, 154
Petroleum of the Mississippi Valley, 287
Phipson on the presence of Aniline in certain Fungi, 305
Physical Society, Proceedings of, 137
Pierre, Isadore, on the Quantities of Nitrogen in the Soil at Various Depths, 307
Plant and Animal Distinguished, 216
Poison Oak of California, 167
Prairies, Origin of, 294
Prestwich, Joseph, on Flint Implements, associated with Extinct Mammalia, 314
Reptiliferous Sandstone of Elgin, Physical Relations of, 95
Retinal Impressions, 291
Reviews and Notices of Books, 102
Rhind, William, on Morayshire Reptilian Fruits, 153
Rhone, Colour of, 213
Rogers, Professor W. B., on Binocular Vision, 285
——— on Retinal Impressions, 291
Royal Society of Edinburgh, Proceedings of, 108
Sang, Edward, on the Span of a Chain of given Material, 110.
Sarcina ventriculi, Remarks on, 58
Schmidl, Maximilian, on the Constitution of the Essential Oil of Cajeput, 127
Scientific Intelligence, 304
Sea, Agitations of, in the West of England, 1
Societies, Proceedings of, 265
Smith, Dr John Alexander, on Various Fishes, 148
——— Dr John, on the Angwántibo of Old Calabar, 155

XUM

Species, Origin of, 320
——— Permanence of, 233
Spring in Florida called the Silver Spring, 283
Storms in Britain, 266
Symonds, Rev. W. S., on the Physical Relations of the Reptiliferous Sandstone of Elgin, 95
Temperature, Underground, Observations on, 133
Teredines, or Ship-worms, of Britain, 278
Thermometer, Registering, of Dr James Lewis, 325
Thomson, Professor William, on the Reduction of Observations of Underground Temperature, 137
——— Rev. W. C., on Ferns from Old Calabar, 161
Triassic Drift, near Frome, with Organic Remains, 269
Turner, Dr William, on the Thyroid Gland in the Cetacea, 122
Tyndall on the Glaciers of the Alps, Reviewed, 249
Vegetable Morphology—its General Principles, 185
——— Parchment, 324
Vegetation, Ancient, of North America, 305
Volcanoes, Elevation Theory of, 173
Vomer in Man and Mammalia, 242
Whales, Capture of, by Means of Poison, 72
Whirlwind near Penzance, 203
Wright, Dr T. Strethill, on British Zoophytes, 156
Zinc Methyl, Remarks on, by J. A. Wanklyn, Esq., 120
Zoology, Methods in, 288

END OF VOLUME TWELVE—NEW SERIES.


EDINBURGH: PRINTED BY NEILL AND COMPANY.
